

BRAND BOOK V2.0
SPRING 2026

PennyLime.

Funding for drivers, sellers, and operators. Built for the way platforms pay. Funded by your earnings, not your credit score.

A book in 14 parts.

| 06 The Lime & The Wordmark | 13 Applications |
| 07 Color | 14 Don'ts |

Built for the way platforms pay.

Sixty million Americans now run small businesses inside platforms. They drive for Uber and Lyft. They deliver for DoorDash, Instacart, and Amazon Flex. They sell on Amazon, Shopify, and Etsy. They take gigs on Fiverr, Upwork, TaskRabbit, and Rover. The platform is the storefront, the app is the back office, and the bank deposit is the receipt.

The financial system never adapted. Banks still ask for a W-2. Underwriting models still optimize for predictable salary income. Repayment terms still assume you get paid every other Friday by the same employer for thirty years.

So we built PennyLime. We read 90 days of bank deposits the way the old system used to read a pay stub. We size funding based on what you actually earn. We collect repayment as a percentage of your future earnings, not a fixed monthly bill, because the work itself isn't fixed.

If you drive, deliver, sell, or ship, we fund you. In 48 hours.

FROM APPLICATION TO
FUNDED

What we believe.

MISSION

Fund the people who make the on-demand economy run, on terms that respect what they actually earn.

VISION

A world where a Tuesday-night Uber driver, an Amazon FBA seller, and a Fiverr designer can all access capital as easily and fairly as a Fortune 500 company.

PROMISE

Your platform earnings are your credit. We disclose every cost in plain English before you accept. We say no when no is the right answer.

VALUES

Plain English

Factor rate. Daily remittance. Total cost. Spelled out before you tap accept. No fine print, no asterisks, no surprise fees.

Earnings > Credit

90 days of bank deposits is a better predictor than a FICO score for a 1099 worker or platform seller. We underwrite reality, not paperwork.

Fast or it doesn't count

Money you need next week is a different product than money you need tomorrow. We optimize for now, because that's when it matters.

Decline kindly

If we can't fund you safely, we'll say so within minutes and explain why. Hope is not a product.

Tech, not theater

Plaid for income. Increase for ACH. Real APIs running real underwriting. Not a 1990s underwriter in a startup t-shirt.

Repayment is a relationship

Slow week? Your remittance is a percentage of receivables, not a fixed bill. The product moves with you. Reward repeat customers.

Where we sit.

PennyLime is a tech-driven funding platform for the on-demand workforce. Our product is a merchant cash advance, but our positioning is a software company. We earn customer trust the way Stripe earned developer trust: with transparency, predictable APIs, and a brand that signals competence and warmth at the same time.

POSITIONING STATEMENT

For drivers, sellers, and operators who earn through platforms and can't get a fair shake from traditional lenders, PennyLime is the tech-driven funding partner that buys a piece of your future earnings at a transparent rate, deposits cash within 48 hours, and adapts when your week does. Unlike payday lenders, generic MCAs, or banks, we underwrite from real-time bank data and price for the actual risk of the income, not the absence of a W-2.

WE ARE

- A tech company that ships funding
- A receivables-purchase product (MCA)
- API-driven and audit-ready
- Fair, fast, transparent
- Built specifically for platform earnings

WE ARE NOT

- A bank or licensed lender
- A payday loan
- A generic MCA chasing restaurants
- A credit-score-driven product
- "Lending for the underbanked"

Drivers. Sellers. Operators.

Our customer is not a type of person. It's a type of work. Three audiences, one truth: a platform pays them, deposits prove the income, banks don't get it.

DRIVERS

The Wheel-Bound

Uber, Lyft, DoorDash, Instacart, Amazon Flex, Grubhub. Vehicle-dependent. Repair urgency. Multi-platform. \$500-\$5K for brakes, transmission, a new tablet, gas during a slow week.

SELLERS

The Inventory Operators

Amazon FBA, Shopify, Etsy. Inventory cash-flow crunch. Need \$2K-\$10K for the next FBA order, the holiday inventory cycle, the marketing push before Q4.

OPERATORS

The Project-Paid

Fiverr, Upwork, TaskRabbit, Thumbtack, Rover. AR-gap problems. Need \$1K-\$5K to bridge the slow month, fund a tool upgrade, cover a marketing test.

WHAT THEY SHARE

1.

Their bank deposits
ARE their proof of
income.

2.

A real number, fast.
Don't waste their
time.

3.

Fair pricing in plain
English. Show the
total cost.

4.

Flexibility when life
happens. Variable
remittance is the
gift.

Confident. Clear. Helpful.

PennyLime sounds like a smart friend who happens to run a fintech. We tell the truth fast, in short sentences. We don't shout. We don't flatter. We don't hide behind disclaimers. We name the platforms our customers actually use.

VOICE TRAITS

- Direct, never preachy
- Confident, never cocky
- Warm, never saccharine
- Smart, never clever
- Specific, never generic

WE SAY

- Fund / Funded / Funding
- Cash advance / Advance
- Verified earnings /
Verified deposits
- Plain factor rate
- Drivers, sellers, operators

WE DON'T SAY

- Loan / Lending / Borrow
- APR / Interest
- "Easy money"
- "You qualify!" (without context)
- "For the underbanked"

VOICE IN PRACTICE

YES

"You're approved for \$3,000. Repaid as 7% of your daily Uber and DoorDash deposits, ~24 days at your average earnings. Total cost \$390. Tap accept to move."

NO

"Congratulations! You may qualify for our exclusive funding offer. APR varies. See terms. Get cash now!*"

YES

"We can't fund this one. Your last 30 days had three returned deposits. Try again in 60 days, or chat with us about what changed."

NO

"Unfortunately, your application was unable to be approved at this time due to underwriting criteria."

A lime. A name. A period.

Two pieces. The lime mark for compact contexts (favicon, app icon, social avatar, swag). The wordmark for everywhere there's room. They never appear together as a forced lockup, because each does the job alone.

The lime mark. A half-slice cross-section of a lime, illustrated with warmth: bumpy rind, eight visible segments, juicy translucent flesh, white pith. Sits at a slight tilt with a soft ground shadow. Friendly, edible, unmistakable.

The wordmark. "Penny" in ink, "Lime" plus the trailing period in brand green. Inter 800, letter-spacing -5%. The period turns the wordmark into a sentence: declarative, finished, confident. Never set in all caps.

On warm paper

On ink (knockout)

On brand green (full color)

Clear space & rules.

Clear space

Always reserve a margin equal to one-third of the mark's height on all sides. Nothing — type, image, edge — encroaches.

Minimum sizes

Mark must remain legible. Below these thresholds, fall back to a simplified single-color version (coming in v2.1).

PRINT	14pt / 5mm height min
DIGITAL	32px height min
FAVICON	Use simplified mono variant
EMBROIDERY	Single-color, simplified outline

Don't

- Stretch, skew, rotate, or recolor
- Add drop shadows beyond the built-in one
- Place on busy photographs without an underlay
- Crop the lime tighter than its natural canvas
- Substitute the wordmark font

A green that means yes.

Lime green is the brand. Not a finance blue. Not a fintech violet. The color of go, of approval, of growth. Held against an ink-black or warm-paper neutral, it does the entire emotional job of the brand.

PRIMARY Lime Green HEX #15803D RGB 21, 128, 61 CMYK 84, 22, 99, 8 Pantone 348 C	ACCENT Bright Lime HEX #22C55E RGB 34, 197, 94 For highlights and illustrations only	DEPTH Forest HEX #166534 RGB 22, 101, 52 For hover states and pressed UI
LIME Vivid Lime HEX #A3E635 RGB 163, 230, 53 The color of the lime mark interior	TINT Mist HEX #DCFCE7 RGB 220, 252, 231 Card backgrounds, "approved" status pills	PITH Pith HEX #FEFCE8 RGB 254, 252, 232 Soft surfaces, the cream layer of the lime
INK Ink HEX #0A0A0A For body type and primary surfaces	SEMANTIC Amber HEX #F59E0B Warning states, "needs attention"	SEMANTIC Red HEX #DC2626 Errors, declines, destructive actions

One sans, two weights, one mono.

PennyLime types are restrained on purpose. A single contemporary sans handles both display and body. A monospace partner handles numbers, code, and the small data details that signal we are a tech company.

PRIMARY

Inter

A modern grotesque sans. Used for everything except numerals in data contexts.

Weights deployed: 400 (body), 600 (UI emphasis), 700 (subheads), 800 (display).

MONO

\$3,000.00

Geist Mono. Used for currency, factor rates, transaction IDs, code, and any digit grid. Anywhere precision matters.

Get funded.

Display 800
120 / 110

Funding for drivers, sellers, and operators.

Section 800
48 / 52

Your platform earnings are your credit.

Heading 700
22 / 28

Verified deposits, plain factor rates.

Subhead 600
16 / 22

A merchant cash advance is the purchase of a portion of your future receivables at a discount, in exchange for a lump sum today. Not a loan. No APR. No interest. Just a transparent factor rate disclosed before you accept.

Body 400
14 / 22

\$3,000 · 1.30 factor · 24 days · \$390 cost

Two-pixel rule.

Icons are drawn with a 2-pixel stroke, rounded caps, and rounded joins. No fills. No multi-color icons. They live in a 24-pixel grid and align to whole pixels at common UI sizes. The vibe is engineering, not illustration. The lime mark is the only allowed exception.

Source: Lucide icons (lucide.dev), MIT-licensed, customized to brand stroke and color. New icons inherit the same 24-grid, 2-pixel stroke, and round join geometry. Filled icons are reserved exclusively for the system status pills (success, warning, error). The lime mark stands alone as the brand's only multi-color illustration.

Real people. Real platforms.

PennyLime never uses smiling-stock-actor handshake photography. Our visual world is two layers: documentary photography of platform work in progress, and the lime mark as the signature illustration accent. Editorial illustration is permitted for product moments only.

Documentary, candid, available light.
Driver's seat at 6am, delivery bag on a sidewalk, an Amazon FBA seller's desk, the moment of a bank notification.

Photography · Documentary. Cool color cast. People working at platforms, never posing. Avoid handshakes, board rooms, white-toothed smiles.

The lime mark · Sits on warm paper or ink. Gets the spotlight. Never crowded by other illustrations.

Illustration system rules

The lime is the star

Editorial illustrations support the lime, never compete with it. The lime gets the warmth; everything else stays geometric.

Two-color limit

Brand green plus one neutral for editorial illustration. Tints/shades of green allowed. The lime mark is the only multicolor exception.

Show the artifact

Phones, app screens, bank statements, receipts, dashboards. Illustrate the artifact of the transaction, not the handshake.

Confident, not hyperactive.

Movement signals technology and momentum, but never desperation. PennyLime motion is decisive: short durations, ease-out curves, no lingering bounces or attention-seeking loops.

DURATION

Standard transitions
220ms. Page changes
340ms. Status
confirmations **450ms** with
overshoot.

EASING

ease-out for entries.
ease-in for exits. Never
linear, never bouncy.

DIRECTION

Forward motion only on
success. Backward motion
reserved for errors and
reversals. Vertical for steps
in a flow; horizontal for
time.

Signature interactions

- **Approval moment:** The lime mark briefly grows 8% then settles, with a soft ground-shadow pulse. The status badge ticks to "Approved."
- **Number reveal:** Currency values count from 0 to final on first paint over 600ms. They do not animate on subsequent loads.
- **Step progression:** Vertical scroll between steps. Each step's headline fades in on entry (220ms), supporting copy 80ms after.
- **Success disbursement:** A single particle of brand green travels from the bank icon to the user's account icon along a smooth path. One time, never looped.

Tokens & building blocks.

Where the brand lives.

The PennyLime brand operates across web, mobile, transactional email, social, and the rare physical surface (business card, swag, partner deck). Below, a sample application rendered in-system.

Mobile app — approved screen

Email — funded confirmation

If you do these, we are no longer us.

DON'T

Call the product a "loan"

It is a merchant cash advance, the purchase of future receivables. The legal distinction matters and the brand reinforces it everywhere.

DON'T

Use APR or interest-rate language

Cost is expressed as a factor rate. Quoting an APR triggers regulatory exposure and confuses the customer.

DON'T

Show stock photos of suits shaking hands

Our customers don't wear suits. Use documentary photography of actual gig and platform work, or system-styled illustration.

DON'T

Use "easy money" or pity language

We don't sell desperation. Our copy treats the customer as a smart business operator facing a normal capital need.

DON'T

Crop, recolor, or restyle the lime mark

The lime is the only multicolor illustration in the system. Modifying it dilutes the only visual moat we have.

DON'T

Hide the total cost

Total dollar cost is shown above the fold of every approval screen. No fine print, no asterisks. Transparency is the product.

When in doubt: simpler, clearer, less. Ask "would I trust this if I drove for Uber, sold on Amazon, or freelanced on Fiverr?" before shipping anything that says "PennyLime."

Funding for drivers, sellers, and **operators.**
